Summary

Senior product designer with 8 years of experience designing complex enterprise workflows. MSc in HCI with a technical foundation that informs how designs get built. Leads end-to-end from research through design QA.

Experience

AstraZeneca

Senior Product (UX) Designer
UX Designer

June 2020 – Present
April 2018 – June 2020

- Led end-to-end design of AstraZeneca's first custom generative AI enterprise platform, spanning core chat, RAG, and workflow integrations
 - Achieved 93% lifetime adoption (~84K users) and ~60K MAU, with an 11% increase in active users
 - Helped save users an average of 2.7 hours per week through workflow automation and improved information access
 - Supported 48M+ prompt-completion pairs in 2025, requiring scalable interaction patterns and resilient system behavior
- Redesigned a global KPI dashboard used across manufacturing and operations teams
 - Replaced fragmented PowerPoint- and BI-driven workflows with a standardized, automated review workflows
 - Contributed to ~\$300K in annual cost savings through legacy tool decommissioning
 - Led end-to-end design across summary views, drill-downs, filtering systems, progressive disclosure patterns, and meeting-preparation workflows for data-dense environments
- Designed and maintained a design system in Figma, including tokens, components, and patterns aligned with front-end implementation
- Used AI-native prototyping tools such as Claude Code and Figma Make to prototype flows and interactions
- Established and conducted design QA practices to ensure implementation fidelity across products
- Partnered closely with product owners, engineers (frontend, backend, ML/MLOps), UX researchers, QA, and change-management teams
- Co-created and taught design thinking courses for 300+ non-design colleagues, building shared UX vocabulary and organizational fluency

- Mentored junior designers and contributed to organization-wide design meetups to share work, standards, and practices

U.S. Department of Housing and Urban Development

UX Designer

January 2017 – April 2018

- Co-led an intranet redesign for IT, significantly reducing internal help requests and support overhead
- Introduced and taught design thinking practices to cross-functional colleagues within a federal agency environment

AccessLex Institute

UX Designer

January 2010 – August 2015

- Sole UX designer responsible for interaction design and front-end development across corporate websites and digital communications supporting financial literacy initiatives.

Education

University College London

MSc, Human–Computer Interaction

September 2016

University of Delaware

B.A., English; Minor, Computer Science

May 2010

Skills

- Interaction design for complex workflows and AI-assisted systems
- Information architecture and mental-model design
- Data-dense dashboards and decision-support interfaces
- Design judgment under technical and organizational constraints
- Figma Design, Figma Make, Claude Code
- Visual hierarchy, spacing, and typography
- Design-to-engineering alignment and design QA
- Cross-functional partnership with PM, Engineering, and Research
- Clear design communication and stakeholder influence
